Talk about this story Google announced that Chromium Apps would be removed from Home windows, Macintosh, and Linux variations of Stainless (but not Chrome OS) some period in 2017, and it appears we've come to that stage today.

I'meters having the same problem Deleted Chromium, but the malware arrives back again.. I re-downloaded Chrome once again, and I had been able to remove WeKnow from the research engine choices, nevertheless when I open up a brand-new tab it still redirects me to the WeKnow lookup engine, actually though when I proceed back again to look at my configurations it's simply no more time there.
